

PLASTIC MANUFACTURING QUESTIONNAIRE

Applicant: _____

Processing methods used: Blow Molding Extrusion Injection Molding
 Compression Molding Thermoforming Lay up Molding
 Calendering Other: _____

Detailed description of manufacturing process:

Type of plastics: Type 1 (PVC, teflon, metamine, fomica & phonetics, other: _____)
 Type 2 (polyurethane, cellulose acetate & polypropylene, rubber, other: _____)
 Type 3 (cellulose nitrate, pryoxylin & nitrocellulose, other: _____)

Is process automated, computer-operated or manual? _____

Plastic resins used: Pellets Flakes Granules Powders Liquid Paste
 Other: _____

Are electrical equipment and wiring explosion proof? Yes No

Are all process equipment grounded and bonded? Yes No

Does the equipment have automatic shut off? Yes No

What is the age of the processing equipment? _____

Describe any obsolete, imported or custom-made equipment: _____

What is the inspection and servicing schedule for equipment (including conveyors, hydraulic lines, etc.)?

How often is the electrical equipment and wiring inspected and serviced by a licensed professional?

Are you in compliance with NFPA 70 on electrical codes? Yes No

Are you in compliance with NFPA 77 on static electricity? Yes No

Does the production machinery have dust tight seals and explosion venting?..... Yes No

Do you have trained in house fire brigade?..... Yes No

What is the response time from the Fire Department? _____

Do you have your own water source on site? Yes No

If yes, describe: _____

Do you have your own fire-fighting equipment on site? Yes No

If yes, describe: _____

Are there grinding or finishing operations?..... Yes No
If yes, is there a shield guard? Yes No
Please provide details on these operations:

Are there painting or laminating operations?..... Yes No
U/L approved paint booth?..... Yes No
If no paint booth, describe how it is controlled: _____

Are there welding operations?..... Yes No
If yes, are hot work permits obtained? Yes No

Storage of Raw Material:

Is storage of raw material separated from production or finished product? Yes No
If yes, by: Firewalls Separate Building Other: _____
What is the average size of stockpiles? _____

Storage of Chemicals, Flammables or Solvents, etc.:

Is storage separated from all other operations? Yes No
If yes, by: Firewalls Separate Building Other: _____
What additives and catalysts are used? _____
What other flammables, chemicals or solvents are used? _____
Quantity of each? _____
Container type, size and number of gallons? _____
Are Material Data Safety Sheets on file and available? Yes No
Finished product: _____
Are all 55 gallon drums storing chemicals properly grounded? Yes No
Is only a single day's supply stored on the premises?..... Yes No
If no, how much? _____
Is storage area properly ventilated?..... Yes No
If no, what kind of ventilating is used? _____
Are you in compliance with NFPA 30 standards?..... Yes No

Storage of Finished Product:

Is storage of finished products separated from the production area? Yes No
If yes, by: Firewalls Separate Building Other: _____
What is the average size of the stockpiles?
